**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoppin (US Patent No. 2,923,621, cited in the IDS submitted December 17,2003).

Hoppin teaches a nickel brazing alloy comprising:

chromium	10 to 30 wt%
manganese	7 to 15 wt%
silicon	8 to 12 wt% and
nickel	the balance (column 2, lines 49 and 50)

The chromium and manganese contents taught by Hoppin overlap the chromium and manganese content recited in applicants' claim.

The claim and Hoppin differ in that Hoppin teaches a silicon content of 8 to 12 wt % while applicants' claim recites a silicon content of 5 to 7 wt %.

Art Unit: 1742

However, one of ordinary skill in the art at the time the invention was made would have considered the invention to have been obvious because the claimed silicon content (5 to 7 wt %) and the prior art silicon content (8 to 12 wt %) closely approximate each other, that is the claimed upper limit of 7 % and Hoppin's lower limit of 8 wt % closely approximate each other and therefore the range of the prior art establishes *prima facie* obviousness because one of ordinary skill in the art would have expected the similar ranges to have the same properties. See *in re Peterson*, 65 USPQ2d 1379, 1382, citing *Titanium Metals Corp. v. Banner*, 227 USPQ 773, 779 and MPEP 2144.05.

“a *prima facie* case of obviousness exists where the claimed ranges and prior art ranges do not overlap but are close enough that one skilled in the art would have expected them to have the same properties. *Titanium Metals Corp. of America v. Banner*, 778 F.2d 775, 227 USPQ 773 (Fed.Cir.1985)(Court held as proper a rejection of a claim directed to an alloy of “having 0.8%nickel,0.3%molybdenum,up to 0.1%iron,bal - ance titanium ” as obvious over a reference disclosing alloys of 0.75%nickel,0.25%molybdenum,balance titanium and 0.94%nickel,0.31%molybdenum,bal - ance titanium.).
